SUMMARY

IT Support Engineer transitioning into Cloud & DevOps with hands-on experience building and troubleshooting AWS infrastructure. Experienced in Linux, networking, application deployment, and root-cause analysis, with practical AWS projects involving EC2, VPC, RDS, Secrets Manager, IAM, Nginx, Gunicorn, and WireGuard.

TECHNICAL SKILLS

- **Cloud:** AWS EC2, VPC, RDS, S3, Secrets Manager, IAM, Security Groups, Elastic IP
- **Systems:** Linux, Windows Server, Active Directory, Group Policy, SSH, Proxmox, Docker, VirtualBox
- **Networking:** TCP/IP, DNS, VPN, Firewall, Routing, Network Segmentation, WireGuard
- **Web & Deployment:** Nginx, Gunicorn, Flask, systemd, REST APIs
- **Programming & Databases:** Python, MySQL, Git
- **Troubleshooting:** Root-Cause Analysis, Incident Triage, Log Analysis, Application/Database Troubleshooting

PROFESSIONAL EXPERIENCE

IT Support Engineer — NCC Directorate, Maharashtra Dec 2025 – Jun 2026

- Provided technical support and troubleshooting for 40+ systems, resolving software, application, OS, and connectivity issues.
- Performed system and application troubleshooting using logs and structured root-cause analysis.
- Worked on a Dell server environment, deploying Windows Server and configuring Active Directory, Group Policy, and firewall rules.
- Supported infrastructure security and reliability through patching, antivirus checks, and recurring issue documentation.
- Maintained IT inventory and supported LAN/infrastructure requirements for an e-Office environment.
- Integrated Minutes.ai with Claude AI to automate meeting note-taking and generate structured meeting minutes.

Freelance Technical Support (Remote) Jan 2024 – Mar 2025

- Troubleshot MySQL database issues including connection errors and query-related problems.
- Supported programming, scripting, OS-level, API integration, and application issues remotely.
- Diagnosed technical problems and explained fixes clearly, often resolving issues within a single session.

CLOUD & INFRASTRUCTURE PROJECTS

Flask Application on EC2 with Private RDS & Secrets Manager

- Designed and deployed a multi-tier AWS architecture with Flask on public EC2 and MySQL RDS isolated in private subnets.
- Configured Nginx reverse proxy and Gunicorn with systemd for production-style application deployment.
- Implemented an EC2 IAM instance profile to retrieve secrets dynamically from AWS Secrets Manager, removing hardcoded credentials.
- Configured security-group chaining so RDS accepts MySQL traffic only from the application server; resolved IAM AccessDeniedException and database connectivity timeouts.

AWS ↔ Homelab WireGuard VPN

- Built a VPN connecting an AWS EC2 WireGuard server with a Proxmox homelab for remote access to private services.
- Configured IP addressing, routing, firewall rules, and WireGuard peers; troubleshot connectivity across EC2, LXC services, and a mobile client.
- Documented architecture, configuration, troubleshooting, and the final working topology.

AWS VPC & Bastion Host Lab

- Built and tested public/private networking with route tables, security groups, NACLs, and bastion-based access.
- Validated HTTP/HTTPS access and controlled SSH access while troubleshooting network connectivity.

Flask Deployment – Nginx & Gunicorn

- Deployed a Flask application on EC2 using Gunicorn behind Nginx with system-level service management and HTTP/HTTPS access.

ADDITIONAL PROJECTS

- **Homelab – Proxmox • Docker • Linux:** Built containerized applications and internal services using Docker and Portainer; used the homelab to develop and test distributed applications, APIs, databases, and infrastructure.

CERTIFICATION & ACHIEVEMENTS

- **AWS Certified Cloud Practitioner** – AWS, Credly Valid Aug 2026 – Aug 2029
- **Jungle Safari** – Top 4 Finish, DotTech Festival Hackathon (2023)

EDUCATION

Bachelor of Science, Information Technology 2020 – 2024
D.G. Ruparel College of Arts, Science, and Commerce
