Professional Summary

IT Support Engineer with experience supporting enterprise IT operations, Windows/Linux administration, networking fundamentals, virtualization, and end-user support in a government environment. Built and maintain a Proxmox-based homelab featuring Docker containers, Linux services, and secure remote access to develop practical infrastructure skills. AWS Certified Cloud Practitioner and seeking Cloud Support, Systems Administration, or IT Infrastructure roles.

Technical Skills

Cloud	AWS, IAM, EC2, S3, VPC, CloudWatch
Systems	Windows 10/11, Ubuntu, Debian, Linux CLI, SSH
Virtualization	Proxmox VE, Docker, LXC, Portainer, VirtualBox
Networking	TCP/IP, DNS, DHCP, NAT, VLANs, VPN, Samba, NFS, Firewall Configuration
Tools	Git, Cloudflare Tunnel, TeamViewer, AnyDesk, Parsec, Recuva

Professional Experience

IT Support Engineer / IT Supervisor

Dec 2025 – Jun 2026

NCC Directorate, Maharashtra

- Supported daily IT operations for 40+ systems including troubleshooting, Windows updates, antivirus management, and preventive maintenance.
- Managed inventory of 50+ IT assets while maintaining documentation for hardware, peripherals, and consumables.
- Produced LAN infrastructure documentation and hardware/software requirements for an E-Office deployment.
- Performed secure backup, restoration, and file recovery to support operational continuity.
- Diagnosed and resolved Windows, software, hardware, and basic network issues for end users.

Freelance Technical Support (Remote)

Jan 2023 – Mar 2025

- Delivered Windows and Linux support including OS installation, dual-boot configuration, software deployment, and remote troubleshooting.
- Resolved router, VPN, DNS, and firewall issues while helping users improve system security and reliability.

Projects

Enterprise Homelab Infrastructure

- Built a virtualized infrastructure using Proxmox VE hosting Linux VMs and LXC containers.
- Deployed Docker workloads with Portainer including Jellyfin, Pi-hole, Radarr, and Sonarr.
- Configured Cloudflare Tunnel, DDNS, Samba/NFS, firewall rules, snapshots, and secure remote administration.
- Continuously use the homelab to practice Linux administration, Docker, networking, and cloud concepts.

Education

Bachelor of Science (Information Technology)

D.G. Ruparel College of Arts, Science and Commerce

2020–2023

CGPA: 7.92/10

Certification

AWS Certified Cloud Practitioner (ID: e35d233da23944a28832cd5c93296076)

Verification: Credly, AWS
